Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2862

1. Original claims 12-14 remain in the application and are dependent upon canceled claims. Claims 12-14 remain rejected under 35 USC 112, record paragraph.

2. The disclosure is objected to because of the following informalities: Reference to the claims in the specification is improper.

Appropriate correction is required.

3. The drawings are objected to because box 40 is fig. 1 is not labeled. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 15-24, 31 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evanson et al in view of Moulder et al, of record.

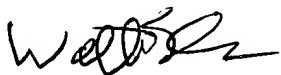

Evanson discloses all of the claimed subject matter except for rotating the sample and setting the temperature of the sample. Moulder teaches in the same field of endeavor setting the temperature of the sample. It would have been obvious to set the temperature of the sample, as claimed, in the device of Evanson in view of the teaching of Moulder. Rotating the sample is considered an obvious matter of design choice.

Art Unit: 2862

6. Claims 25-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
